HEALTH CONDITIONS

Abnormal postural habits or distortions are the result of trauma or stress to the body that have misaligned the vertebrae in your spine. When these vertebrae are twisted from their normal position, they will cause stress to the spinal cord and the delicate nerves that pass between the vertebrae. These misalignments are called Subluxations (sub-lux-a-shuns). It has been extensively documented that subluxations, causing stress to your nerves, will weaken and distort the overall structure of your spine. This results in a weakened and distorted POSTURE. Postural distortions have many serious and adverse affects on your overall health. The most common and detrimental postural distortion is called Forward Head Syndrome (a "hunched forward" posture starting in the neck and progressively moving down your spine weakening the entire body). Please check any health condition you may be experiencing, now or in the past.

TERMS OF ACCEPTANCE

When a patient seeks chiropractic care and we accept such a patient for care, it is essential for both to be working towards the same objective.

Chiropractic has only one goal. It is important that each patient understand both the objective and the method that will be able to attain it. This will prevent any confusion or disappointment.

An **adjustment** is the specific application of forces to facilitate the body's correction of vertebral subluxation. Our chiropractic method of correction is by specific adjustments to the spine.

Health is a state of optimal physical, mental and social well being, not merely the absence of disease/symptoms.

Vertebral Subluxation is a misalignment of one or more of the joints of the body. This may or may not cause pain. This also will result in alteration of nerve function and interference of the transmission of nerve impulses, lessening the body's innate ability to heal and achieve optimal health.

We do not offer to diagnose or treat any disease or condition other than vertebral subluxation. However, if during the course of a chiropractic evaluation, we encounter non-chiropractic or unusual findings, we will advise you. If you desire advice, diagnosis or treatment for those findings, we will recommend that you seek the services of a health care provider who specializes in that area.

Regardless of what the disease is called, we do not offer to treat it. **OUR ONLY PRACTICE OBJECTIVE** is to eliminate a major interference to the expression of the body's innate wisdom. One method is specific adjusting to the correct vertebral subluxation.

I, _____ have read and fully understand the above statement.

Any questions regarding the Doctor's objectives pertaining to care in this office have been answered to my complete satisfaction. I therefore accept chiropractic care on this basis.
