

# Patient Testimonial

*Sheila H. February 16, 2023*

I open my eyes slowly to a new day, “is the pain still here?”. This is something I dealt with for the past years, every day, the pain was getting worse. My thought was that I would have to have surgery, and that was the last thing I wanted. About 6 years ago I hit the back of my head on my nightstand, I should have went in right away, but like so many other people, I put it off. My husband suggested going to Stucky Chiropractic, that’s where he, his entire family, and grandparents went since he was young. He said they are, hands down, the best chiropractor out there. I had to give them a try!

Consultation day I met Dr. Eddie Hall, we talked about all of my concerns, and what he could offer, depending on his diagnosis, (I honestly thought I was dying! Not funny, I thought I had a tumor and was gonna die!) He made me feel so comfortable, and not scared anymore, after the tests, x-rays, and Dr. Hall carefully going over everything, and researching my case, in his private time at home I should add, he told me at my next appointment that he could fix me! Hearing this news made me SO happy, I could live again! I could drive my semi, and actually feel safe doing it, I could keep up with grandchildren, who actually thought my Dr. gave me superpowers! I say this because one day, my granddaughter overheard me telling someone on the telephone that when I go to my chiropractor I feel like I am walking into a magical place! That’s exactly what it felt like to me!

So, the findings, and the fix. I had, (which I never even knew), a slight fracture at the bottom of my skull, which put pressure on my brain. The gap that I am supposed to have between my skull and spine, well, was not exactly a gap! Also, I have always had a curve in my spine since very young, but never followed through correcting it on my own when younger, my fault. Dr. Hall was confident that with our dedication, and hard work, he could fix my neck, and possible the curve. I told him there’s nothing I wouldn’t do to stop this excruciating pain. I started my sessions in the middle of October of 2022. I actually stepped out of the truck and stayed home while my husband ran the company. I went every single day, warm up exercises, laser therapy, decompression table, and the best part, the adjustment! After that, Dr. Hall and I would talk about any concerns, and where we are headed next. I also have my “at home therapy”, which I love!

The last time I was at my chiropractor was January 4th, after re-testing, and going over my results, we were both very pleased!! I knew Dr. Hall has his heart into his work, but when I looked at him after our talk, he had heard, he was so happy with what we both accomplished. He almost made me cry, but only one of us could cry, I thought, lol!!! I saved it for the way home! It’s February 16th, I have been back trucking with my husband since January 30th, and have not been this happy in a long time! I am able to look down, and at my mirrors as much as I need to without feeling THAT pain. Seriously it was a pain I can’t explain to anyone. I’d like to thank Dr. Edie Hall, Stephanie, Charli, and all of the other staff member that helped me, everyone was SO outgoing, with great personalities, they made me feel like family, because of that, and the faith I have in Dr. Eddie Hall, I will be a forever patient!!!
